Testing Stata code and Text

```
1 // Data
2 sysuse census.dta , clear
3
4 // Basic Regression
5 reg divorce marriage pop
6 est sto reg1
7
8 // Basic Regression 2
9 reg medage popurban
10 est sto reg2
11
12 // Indicator Regression
13 reg divorce marriage pop i.region
14 est sto reg3
15
16 // Interaction Regression
17 gen binary = rnormal() > 0
18 lab def binary 0 "No" 1 "Yes"
19 lab val binary binary
20 label var binary "Indicator"
21 reg divorce marriage pop i.region#i.binary
22 est sto reg4
```

This is where you write content describing the Stata code in the text box to the left. Try not to place too much code in the text box. The Stat code is written in the lines before this.

More information about the Stata, giving time for the participants to write the code themselves and run it.

More information about the Stata code and the different ways to code it.

Conclusion

Wrap up final contents of presentation
