AAA - Analytic and Advisory Activities | [Add to search](#)

Term superseded. See Advisory Services and Analytics (ASA).

AAC - Account Assignment Category | [Add to search](#)

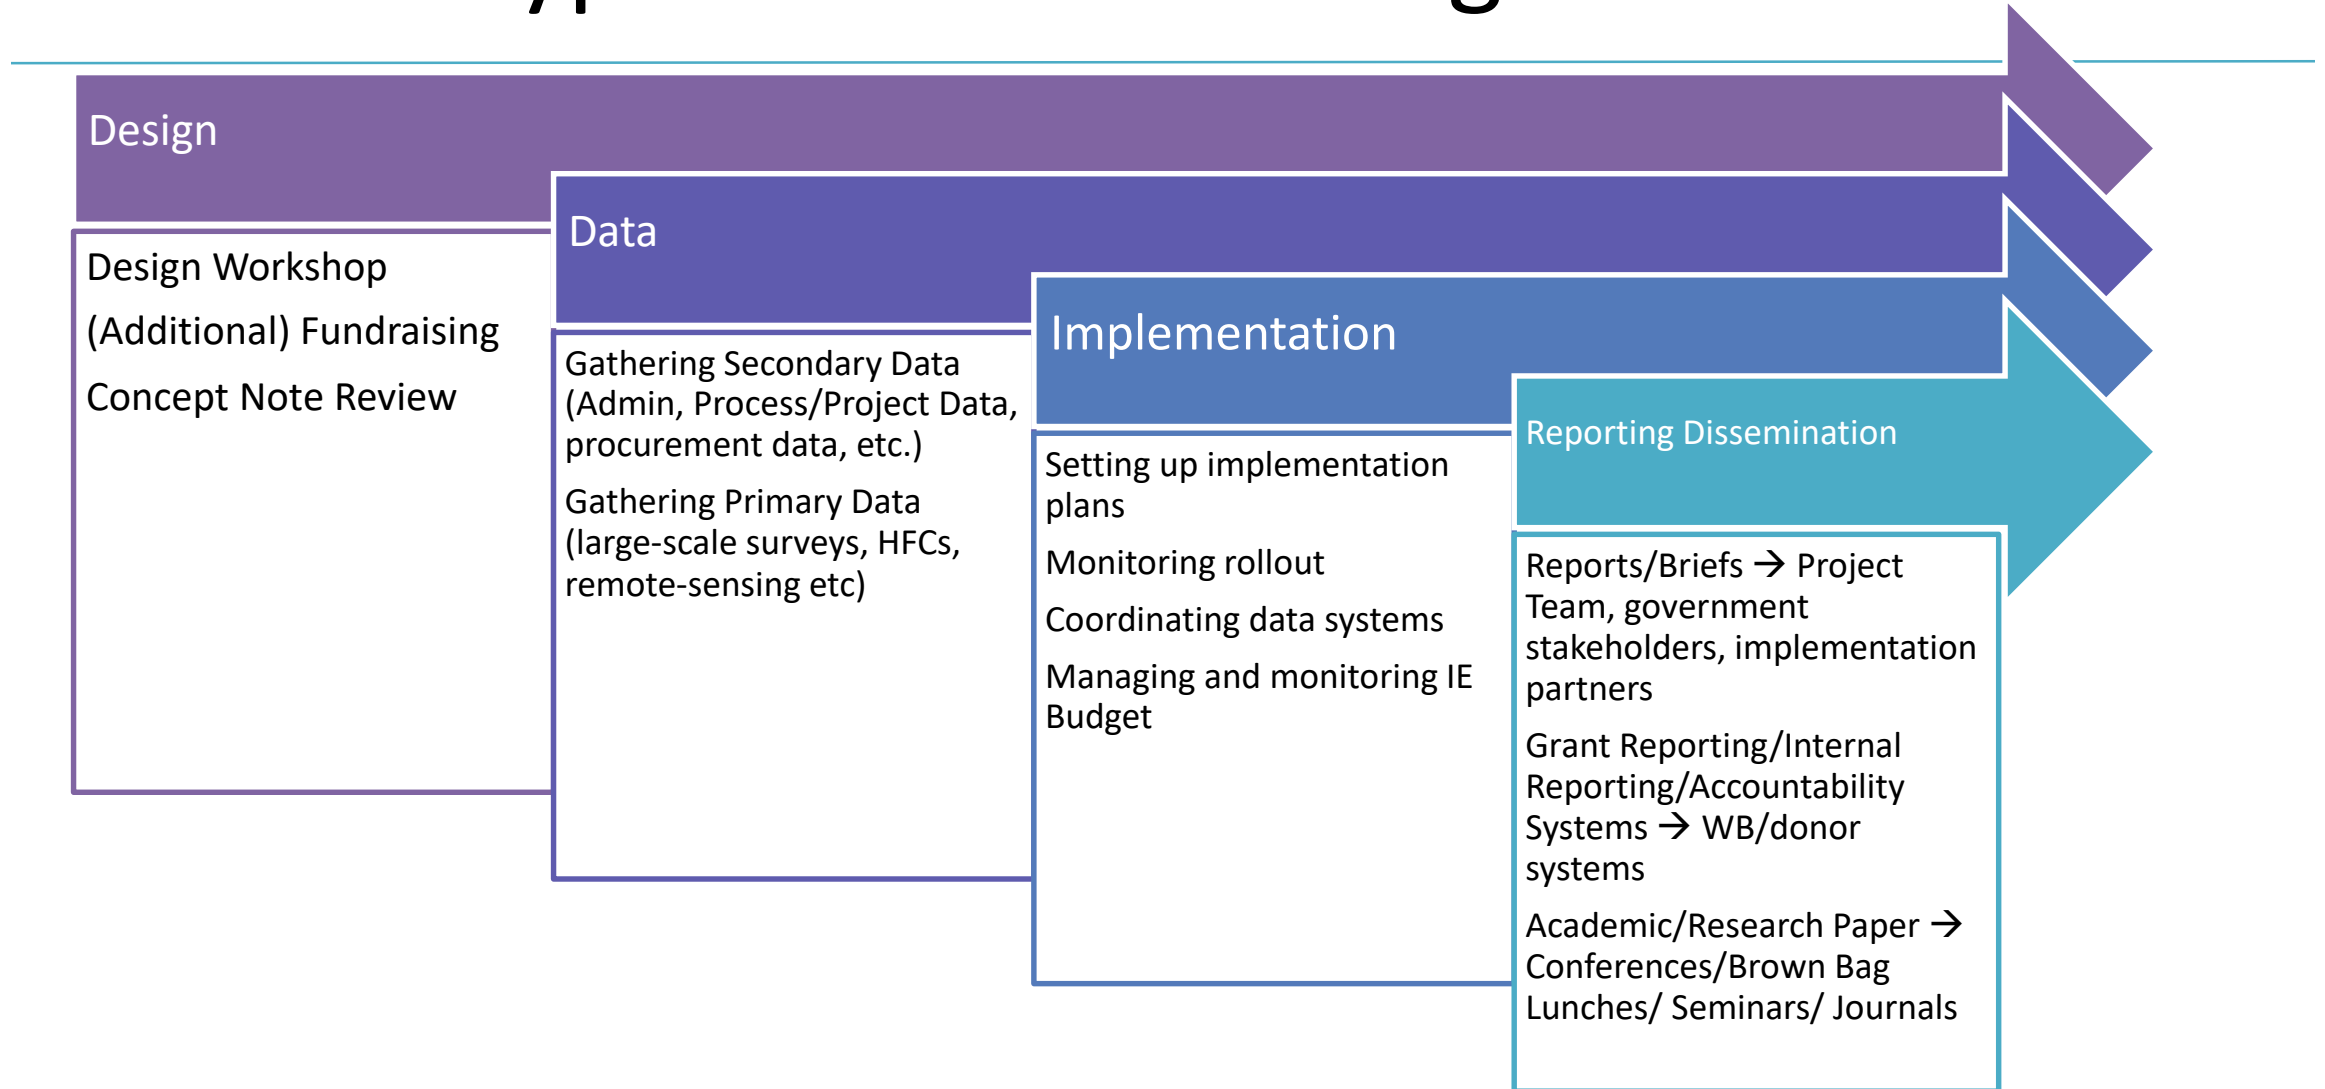

An account assignment is the assignment of a cost or revenue posting to a Controlling (CO) object. Controlling objects include cost centers, internal orders and WBS elements. [Source: Corporate Expense Knowledgebase RM Glossary]

ABC - Activity Based Costing | [Add to search](#)

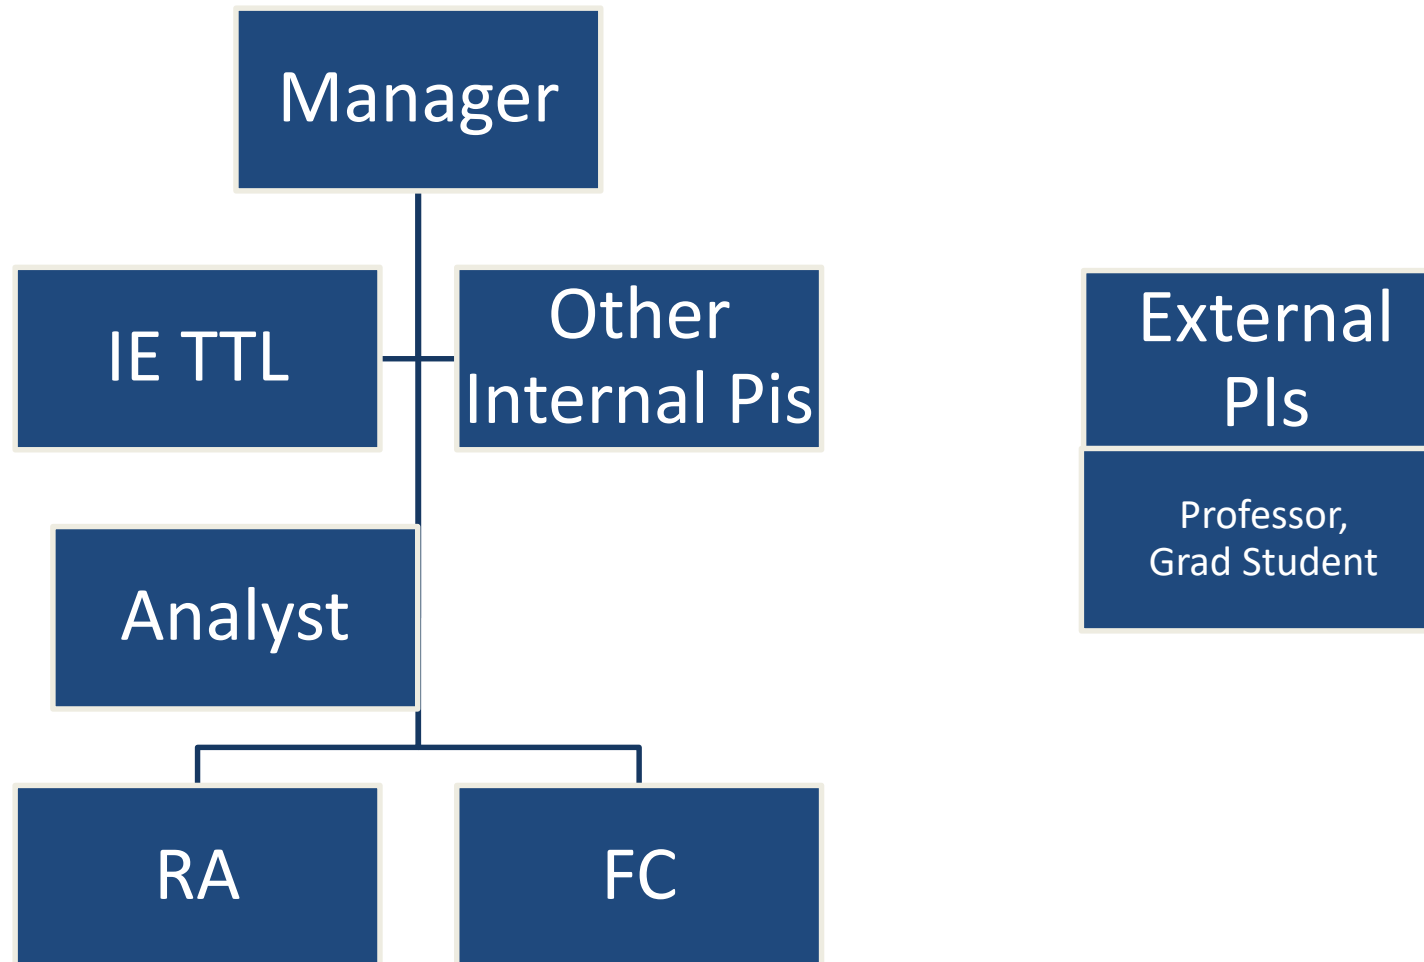

Activity based costing is a cost accounting method that measures the cost of products according to their use of the underpinning activities. It assigns cost to cost objects on the base of cost drivers that cause the cost to be incurred. It does this by recognizing the causal relationship between the cost drivers to activities. [Source: Corporate Expense Knowledgebase RM Glossary]

Typical Process for a given IE

Typical Team Structure

Roles within the IE Team

Principal Investigator

- Lead Researcher for the IE
- Leading IE design, data analysis and final outputs
- Operation of the larger research team, designates operational roles and responsibilities
- Can be one or multiple, which could be a strength given complexity

IE Coordinator/Analyst

- Responsible for day-to-day operation of all processes related to the IE
- Supports RAs and FCs on operational and/or analytical processes
- Coordinates with government and/or donors to synthesize reportings
- Manages IE budget and planning for upcoming activities
- Works programmatically, across multiple IEs

Roles within the IE Team

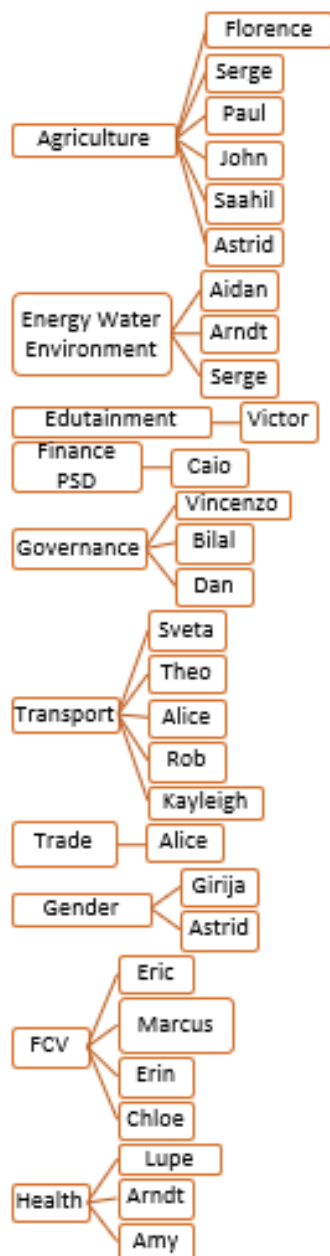

Field Coordinators

- Managing IE in the country where the IE is taking place
- Operationalizing research questions and streamlining into implementation plans
- Liaising with PIU and government counterparts – meetings, IE updates, M&E co-ord
- Monitoring implementation and updating research team
- Supervising data collection in the field (training, enumerator manuals, communication)

Research Assistants

- Typically based in DC/HQ or at the graduate school
- Data management, data cleaning and data analysis
- This includes support in questionnaire-coding, setting up and running back-checks, etc
